Mar 29, 2018 The Kotion Each G2000 is a USB headset that offers some really good components, great sound, and good value. As someone who is mostly into gaming on their PC and consoles, the G2000 fits my needs perfectly. But the problems that I had with it initially were that the device was not recognized, so no sound was coming through. When I tried to find a solution, the best result I found was a USB driver that said it worked with KOTION Each G2000. But since I've tried it and it did not work, it's back to the beginning to figure out what's going on.
